Installation

Expert installation of your new furniture, fixtures, & equipment where and when you need it.

Providing accurate estimates of installation time frames help maximize your room availability.

ISG is flexible in meeting different construction schedules, and will arrange storage of materials if access to the project site is not available due to unforeseen delays.

ISG will install furniture for entire floors or sort through inventory and install single rooms if needed.

Experienced full-time field superintendents travel to each project site providing expert supervision to ensure consistency and quality.

FF&E

Freight Forwarding and Logistics Management including tracking and expediting of product.

- Global asset management
- Complete coded furniture installation
- Attend all project construction and coordination meetings
- Meet trucks, verify deliveries, and synchronize with installation supervisor
- Direct and coordinate phasing of installation with other trades
- Complete final walk-through inspections with customer upon completion

Off-Loading and Unboxing

In addition to new construction projects, ISG has the ability to handle renovations.

ISG will receive all goods (at our warehouse or your own loading dock), unpack, discard packing materials, and install everything according to your floor plan and schedule.

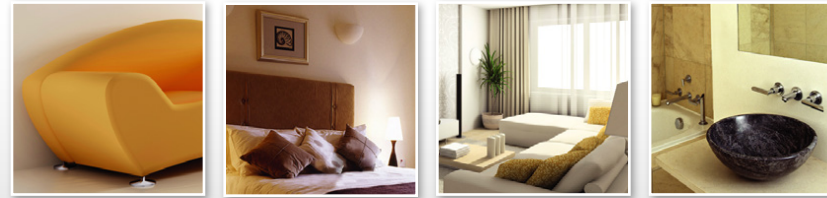

Global-Nationwide Warehousing

Safe storage of your new furniture, fixtures, and equipment.

Synchronization of schedules to protect your new furniture for safe storage until rooms are ready for installation.

Our centralized warehouse is designated as a Free Trade Zone.

ISG receives and installs all soft and case goods – furniture, fixtures, artwork and equipment for new construction and renovation projects.

Full coordination of warehousing, delivery, set up and installation schedules are designed to flow with the general construction critical time-line.

Hotels/ Resorts/ Vacation Ownership • Restaurants, Spas, Country Clubs and Institutions

Asset Control • Logistics - Freight Management • Global Warehousing Network

ISG has developed a professional services platform that increases visibility, dramatically improving the effectiveness of your supply chain to the point where it becomes "Business as Usual".

Effectively controlling the flow of products, information, and financials both internally and externally is critical to successfully managing your supply chain.

www.isg.cc

supplychainmanagement

We begin with a web based network that employs communication management software to streamline purchasing, warehousing, and distribution into one centralized location.

ISG utilizes a set of guidelines and principals that educate and involve all supply chain partners so everyone understands the importance of the properties service level expectations and unique property brand standards.

- Asset Control
- Project Management
- Consolidation
- Freight Management

Transportation SCM Execution Applications

- Worldwide visual inventory management segmented by vendor, property, or warehouse location.
- Extended on-line enterprise that allows the sharing of information both internally to property owners and externally to vendor partners.
- E-mail notification updates with shipment status.
- Captured product shipments and the associated costs separated by property.

- FF&E
- OS&E
- Appliances
- Electronics
- Bathroom Accessories
- Signage

Options Include:

- Route order to proper facility location based on pre-determined business protocols;
 - Closest location
 - Full order or quickest fulfillment
 - Property brand specifications
- Routing of vendor orders to drop ship direct to site.
